

Future Fire Stations

The Township closely monitors emergency response times to identify any areas where emergency responders typically need more than 7 minutes to arrive on scene. Using this data along with observed trends in Dublin's residential and commercial development, the Township has identified and secured property for two future fire stations: 5468 Cosgray Road and 7181 McKitrick Drive. At this time, data does not indicate a need to construct either station in the next five years.

5468 Cosgray Road
