

Home Fire Safety Inventory

This free, confidential service includes consultation regarding emergency escape planning; smoke and carbon monoxide detector placement and testing; and identification of home hazards. Residents who are applying for foster home/adoption status also are served by this program.

Home fire safety inventories are conducted by Fire Prevention Division personnel upon request. These inspections include practices such as Operation EDITH (exit drills in the home); storage practices; burn prevention; and heating and cooking fire safety. Requests for home adoption and foster home inspections for licensing purposes are part of the home fire safety surveys. Residents may also want to complete their own home fire safety survey.

Call 614-652-3930 to schedule an appointment or e-mail.
